As a penetration tester with 3-years' experience specializing in web applications and mobile security, I have a proven track record of conducting tests for high-profile clients. I have experience using advanced tools like Burp Suite for web application penetration tests, ZAP for web and mobile environments, and Frida and MobSF for dynamic and static analysis of mobile apps. I am eager to provide your company with proficiency in translating information from technical to executive/management terminology.

SKILLS

CORE EXPERTISE: Web Application security, Mobile application security (Android & IOS), API Security Testing, Network Penetration testing, Active directory, payment gateway security, Security validation & technical reporting.

SECURITY TOOLS: Burpsuite Pro, Nmap, Cobalt, Nessus, Mobsf, Frida, Bloodhound, CrackMapExec, Metasploit.

PROGRAMMING AND AUTOMATION: Python, Bash Scripting, AI Automation (Claude + MCP).

RISK & COMPLIANCE: ISO 27001, PCI DSS, Security risk assessment.

EXPERINCE

VAPT Consultant

Cyraacs Services Private LTD., Bengaluru, India

2025 – Present

- Conducted security assessments for 350+ applications across Banking, FinTech, Payment Gateway, Web, API, and Enterprise environments, identifying critical security weaknesses and providing actionable remediation recommendations.
- Performed security testing on 150+ Android applications and multiple iOS applications using Burp Suite, MobSF, Frida, and manual testing techniques, uncovering authentication, authorization, data storage, and business logic vulnerabilities.
- I conducted a comprehensive penetration testing assessment against a major e-commerce platform. I identified and remediated critical vulnerabilities that exposed over 10,000 customer records and payment data, preventing substantial financial losses and damage.
- Applied Red Team methodologies including reconnaissance, exploitation, privilege escalation, Active Directory enumeration, and post-exploitation techniques to assess organizational security posture and strengthen defense mechanisms.

Demmisto Technologies Pt. Ltd.

Cyber Security Analyst, Ahmedabad, India

2024 – 2025

- Conducted performance and security testing for enterprise applications, identifying bottlenecks and mitigating risks.
- Developed and executed load and stress test scenarios for high-traffic web applications, improving transaction efficiency by 20%.
- Deliver lecture and hands-on training sessions in cyber security topics, including VAPT, network Security, and OWASP methodologies, to postgraduates' students at silver oak University.
- Collaborated with clients to deliver comprehensive performance testing reports, enhancing decision-making.

Junior Penetration tester- Inter

ASD Cyber Security, Kota, Rajasthan, India

2023 – 2024

- Conducted security assessments for 15+ web applications and 500+ network assets, identifying critical vulnerabilities and security gaps.
- Our efforts uncovered critical SQL injection vulnerabilities and misconfigured access controls, leading to significant security overhauls and enhancing the corporation's overall resilience.
- To enhance the accuracy and quality of our deliverables, I initiated and implemented a comprehensive peer review process for penetration test reports.

Cyber Security Analyst- Remote

CADD Centre, Jaipur, Rajasthan, India

2023 – 2024

- Trained 50+ students and professionals in CEH, Network Security, and Cyber Security fundamentals through hands-on labs, real-world demonstrations, and practical learning methodologies.
- Conducted cybersecurity workshops and technical sessions on Web Security, Network Security, Ethical Hacking, and VAPT concepts, helping participants build industry-relevant skills.
- Developed structured training materials, lab exercises, and assessment modules to bridge the gap between academic learning and real-world cybersecurity practices.

EDUCATION

Masters of Computer Application

2022-2024

JECRC University

Jaipur, Rajasthan, India

Bachelor of Computer Application

2018-2021

S.S. Jain Subodh PG (Autonomous) College

Jaipur, Rajasthan, India

CERTIFICATION

- Certified Red Team Operator - CRT0*
- Certified Red Team Analyst - CRTA
- Certified Ethical Hacker - CEH MASTER
- Certified Network Defender – CND

PROJECTS

Android Root Detection Bypass CTF Lab

- Developed an Android CTF lab featuring multi-level Root Detection, Frida Detection, and SSL Pinning challenges for mobile security training.
- Simulated real-world mobile application protections to help learners practice reverse engineering and security bypass techniques.

Web Reconnaissance Automation Tool

- Developed a Python-based web reconnaissance tool to automate subdomain enumeration, endpoint discovery, technology fingerprinting, and information gathering.
